

WE DARE TO BUILD

LATEST UPDATE

We are we with the progress???

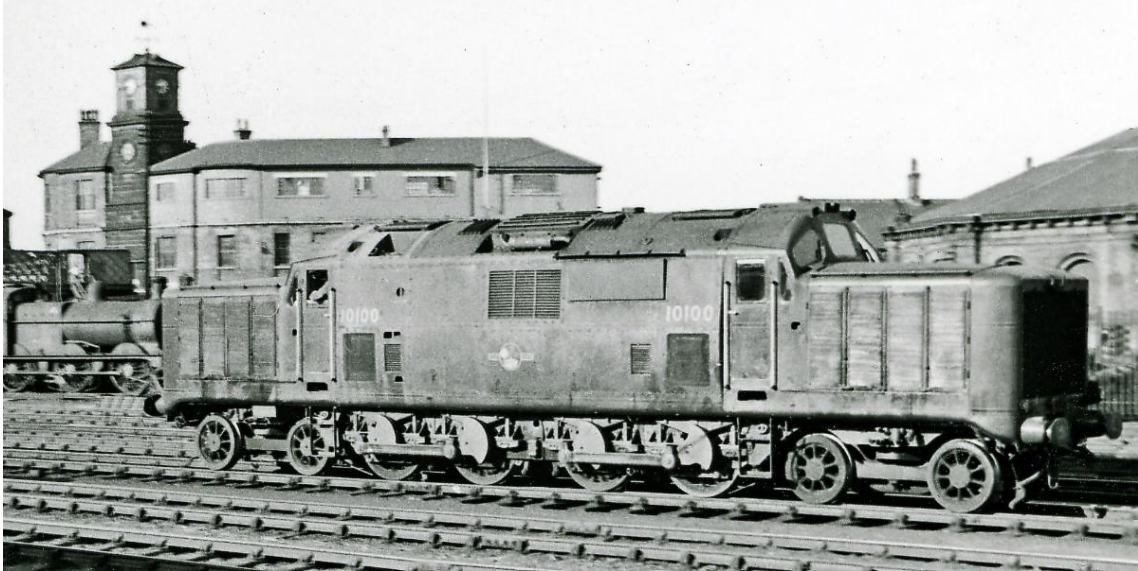

We are moving along with the GT3. However, as you may  be aware China is in the midst of the Corona-virus. This hasn't impacted us just yet as the factory is still closed from the start of the Chinese New Year. So that being said, we are still on track for delivery around June, which is still within our proposed schedule. This is subject to change as we are sure you can understand.

The next sample should be ready at the end of March. We will then begin rigorous testing of the drive train and traction, to make sure it will cope with at least 8 coach rake. In doing this, we can safely assure everyone it will work on most peoples layouts.

Some of our customers have noticed that you can get access to your account. Whilst we try to help you all, we are not fully staffed and it take up a lot of time to go into everyone's account 'just to check'. The

vast majority of our customers have no issue at all, it's a few and mostly because of TalkTalk.net blocking the website emails.

NEW Product Announcement - The Fell.

For all those who missed it, we have announced the launch of our next project. We are now taking deposits for The Fell. It will be available in the running 4-4-4-4 version. It is available in OO and we hope to produce it in N too. Prices are £150 for DCC Ready and £249 for DCC Sound. Head to the website and reserve your model soon.

We will be sending out details directly to all 'The Fell' customers who have signed up about how the payment schedule will work.
